Professor Joshua Lederberg  
Dept. of Genetics  
University of Wisconsin  
Madison 6, Wisconsin

Dear Dr. Lederberg:

It was a great pleasure to learn that you will discuss my paper at the ascites conference in New York this May. I cannot think of anybody else whom I should have liked more as a discutant than you. I hope you won't feel it as a bother to change the exact field of microbial genetics for the obscure jungle of tumors, if for ten minutes only.

I should very much like to use my time in the States to visit you at your laboratory if possible. I shall have to leave for Sweden immediately after the meeting, but I could come to Madison somewhere around May 10-12. Would this (be not) too inconvenient for you and would the date be suitable?

With best regards,

sincerely yours,

*George Klein*
